Subject: Re: Sulfolane SCDM updated values

Hi Brandon,

Yes. Our contractors have finalized the issues and we'll be submitting the files for web posting today. Usually it only takes a day or two for the files to be uploaded, so I'm assuming that it will be up by Friday or early next week, at the latest.

Hi David

I can hold off until the values get posted. Any idea of when they will get posted this week?

Subject: Re: Sulfolane SCDM updated values

Hi Brandon,

Unfortunately, the Quickscore update, which was to incorporate the new SCDM values, has been delayed, and we won't be able to post both Quickscore and the revised SCDM values until next week. We were set to post the SCDM values last Thursday, but the Quickscore update had been delayed. In the interim, please find below the values for sulfolane. We plan to post both documents in final form when we go live with the revised SCDM values next week. The documents say draft, since they haven't been posted on the web, but the same documents will be posted when we go live next week.

[attachment "Tetrahydrothiophene-1-1-dioxideAppBIBII_03312012_draft.pdf" deleted by Brandon Perkins/R10/USEPA/US]

My apologies again for the delay getting SCDM and Quickscore posted. We had some unexpected contractor issues that have slowed things down a bit. If you have any questions, please feel free to contact me.

Sylvia: As Brandon appears to be out next week, do you think you could pass the info along to AK for its review? Brandon said it needed to see the values quickly, and I'd hate to hold up its work.

Thanks so much!

- David

Subject: Sulfolane SCDM updated values

Hi David

I'm going to be on A/L for the rest of this weekend and most of next week. I wanted to check to see if you had an update on the sulfolane values?

Thanks
